

JOSHUA DIVIN

SENIOR VICE PRESIDENT,
WESTERN OPERATIONS

Joshua Divin is Senior Vice President of Western Operations for ABS. In this role, he has operational responsibility for North and South America and Europe, including survey operations, client service delivery and financial responsibility.

Divin is known for his ability to connect with people from diverse backgrounds and develop high-performing teams, helping him progress through several leadership positions during his time with ABS. Previously, Divin served as Vice President of Engineering for the Americas within Global Engineering and Technology. He was also a Government Program Manager and later Director of Navy Programs, during which time he was instrumental in initiating and developing a condition-based class approach for government vessels.

Divin joined ABS in 2007 as an engineer and served in various engineering leadership and program management positions around the globe, including Houston, Shanghai and Singapore. He has a foundation in electrical engineering and experience in naval systems design, marine and offshore construction, and reliability-centered condition-based in-service programs. Divin is passionate about innovation and emerging technologies, including technology's role in augmenting operational business functions.

Joshua holds a bachelor's degree in electrical engineering from Texas A&M University and a master's in engineering management from The George Washington University.
